

press release

aeroyacht – price announced

Monaco, 31 January 2010

Following the most recent design and planning development meetings between Wally and Aeroyacht in December 2009, YCO is pleased to announce that the list price to commission the revolutionary new Aeroyacht has now been confirmed at € 23.6 million.

The final design also includes modifications which will lengthen the Aeroyacht slightly, increasing her waterline to 37m (121ft). This offers the advantage of more interior space and a larger engine room, but most significantly, increases the yacht's top speed potential.

Capitalising on the continuous advances in green technologies, additional research is now underway to leverage developments in diesel electric propulsion, natural energy generation and battery technology to further enhance the Aeroyacht's capabilities.

Travelling at speed in the lightest of winds, the Aeroyacht is in essence a beautiful yacht for the modern world, offering the maximum in luxury, with minimal impact on the environment.
